TECHNICAL SKILLS

Languages: Javascript, HTML/HTML5, CSS/CSS3, Python

Libraries and Tools: React Js, Node Js, Styled components, NPM, Bootstrap, Tailwind, Git

WORK EXPERIENCE

Codentrix Technologies

Chennai

Software Developer

Sep 2021 – Present

- Contributed to over 5 React Js projects, delivering improved UI designs that closely align with the customer requirements, enhancing user experience and satisfaction.
- Leveraged a diverse set of React plugins, including Redux, Reactflow, D3 and others like React Router, Axios, Styled Components to effectively solve unique problems and optimize application functionality.
- Proficient in utilizing the latest ECMAScript features to ensure a robust and maintainable JavaScript code and DOM manipulation techniques.
- Developed a comprehensive label designing platform featuring drag and drop functionality, resizing capability, image attachment, dynamic field integration and precise printing, delivering a highly customizable and user-friendly solution.
- Skilled in integrating web applications with hardware devices, such as printers and scanners, using serial port communication in Node Js.
- Collaborated in agile environment, actively participating in daily stand-ups, efficiently managing and prioritizing bugs, and tracking upcoming tasks to ensure timely project deliverables.
- Led a team of 2 members, effectively overseeing the completion of daily tasks, resolving complex business logics and ensuring adherence to established code standards and best practices.

PROJECTS

Codentrix Technologies

Chennai

Facility Management

- Worked in a tool called Reactflow in React JS library focusing on circuit designs for large building and enabling effective isolation and incident reporting which is currently used across 5 different countries.

Hardware Automation

- A desktop application with React and Node for exam centers facilitating the dispatch of answer scripts to verification centers by integrating more than 4 hardware using PLC.

Tracerbee

- A SaaS based traceability application to track a batch/part within an entire production line, featuring 4 MVPs.

PharmTracQR

- A product solution for the Pharma API manufacturers for label printing and QR code generation to track its entire supply chain.

Print Application

- Utilized Node Js to streamline the process of printing labels, resulting in a 50% reduction in printing time and eliminating the need for manual intervention.

EDUCATION

Hindusthan College of Engineering and Technology

Coimbatore

BE Electronics and Communication Engineering

Graduation Date: May 2024
